

- 产品类型：照明端子,
- 接线方式：铜端子,
- 材料：黄铜,
- 孔径：3.3mm,
- 螺丝：M2.5,
- 型号：4.5x5.5x6

基本参数

|                              |                                                                                     |
|------------------------------|-------------------------------------------------------------------------------------|
| 电压(Rated voltage)-UL:        | -                                                                                   |
| 电流(Rated current)-UL:        | -                                                                                   |
| 电压(Rated voltage)-IEC:       | 400V                                                                                |
| 电流(Rated current)-IEC:       | 15-45A                                                                              |
| 线径(Wire range)-UL:           | 22-14AWG                                                                            |
| 线径(Wire range)-IEC:          | 2.5mm <sup>2</sup>                                                                  |
| 尺寸(Size):                    | 4.5x5.5x6                                                                           |
| 材质(Material quality):        | 黄铜                                                                                  |
| 孔径(Aperture):                | 3.3mm                                                                               |
| 螺丝(Screw):                   | M2.5                                                                                |
| 使用温度(Operating temperature): | -50°C ~ +150°C                                                                      |
| 认证(Approval):                |  |
